

OfficeServ DECT

Cordless Technology from Samsung

The freedom of cordless technology.

Productivity through mobility

Samsung DECT (Digitally Enhanced Cordless Telephony) takes office telephony into new areas, by supplementing user's desktop phones with the freedom to move and work around the office environment.

Style and functionality in your control

The large range of handsets available in this range means there is a handset to suit your business requirements. All handsets are extremely durable with long talk and standby time ensuring you get the best value from your investment for years to come.

For general office use the 5020 and 5040 provide an advanced range of features you would expect from a desk phone. Including personal phonebook, vibrate alert, roaming, auto login, silent mode, redial function and microphone mute.

Handsets designed for particularly rough use are the 6020 and 6040, both handsets are IP rated for dust and water protection with bold contrasting colour schemes and well spaced buttons for ease of use in low light conditions or whilst wearing gloves.

Handsets designed for the healthcare industry are the 7010, 7020 and 7040 range, the 7020 and 7040 have been specifically designed with wipe clean surfaces that can withstand harsh disinfectants, allowing handsets that have been contaminated to be safely cleaned and returned to service. The range has also been designed with complimentary colour coding to staff uniforms.

To give additional protection to your staff, available on selected models are two major safety features. An alarm either activated by a large separate button and/or a rip-off tag, providing protection for vulnerable workers. Also available on selected models is a motion detector, this can be used to raise an alarm if the handset is still for a period of time or conversely if the handset detects sudden movement, this can provide automated alarms for 'man down' situations or emergencies where the user is running.

Samsung DECT - WireLESS is MORE

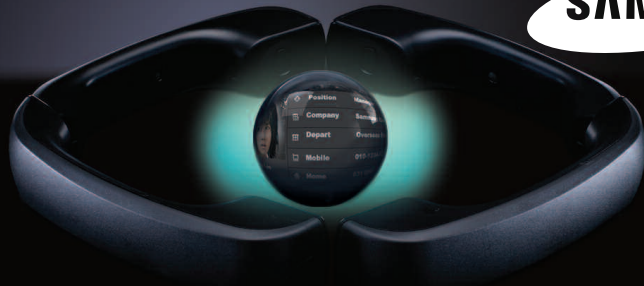

Samsung DECT is available in a variety of configurations with the ability to provide a mobility solution to meet your organisation's needs. Samsung DECT 300 is the simplest and most effective way to implement mobility within your office environment offering applications Samsung DECT 600 is an ideal way to improve the effectiveness of your communications. With a wide variety of enhanced and integrated features available and the registration of up to 480 handsets a Samsung DECT 600 system delivers simple and stylish mobility for larger and more diverse working environments.

Samsung DECT Solutions can be a real problem solver for companies with staff who need mobile communications in the workplace, vastly improving worker efficiency and reducing ongoing communication costs. For large sites, warehousing, hot-desking environments, hotels, hospitals, concert venues, or wherever staff need to be contactable on the move, Samsung DECT Solutions offer an array of sophisticated yet user-friendly features.

OfficeServ DECT

Cordless Technology from Samsung

Benefits of DECT

- Lower operational costs vs GSM/mobile telephones
- Lower cost due to a reduction in call backs
- Getting the right person immediately
- Base station roaming – wide area, un-interrupted coverage
- Fully ETSI Generic Access Profile (GAP) compliant
- Reducing infrastructure costs
- Low power handset suitable for extended use and within areas where interference would be a problem e.g. hospitals
